DETAILED ACTION

This action is in response to Amendment filed June 10, 2004. Claims 12 and 16 have been amended and claims 21-26 have been added as requested by the applicant.

Claim Rejections - 35 USC § 102

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless -

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claims 12, 13, 16-19, 21, 23 and 25 are rejected under 35 U.S.C. 102(b) as being anticipated by Ho ("High index contrast mirrors for optical microcavities").

Regarding claims 12, 16 and 25, Ho discloses a Bragg reflector comprising one or more first layers adjacent one or more second layers, the first and second layers having at least one sidewall, wherein the first and second layers define one or more gaps (Fig. 1a); and a support layer formed over a portion of the sidewalls to support the second layers against movement (page 1308 col. 1).

Regarding claim 13, Ho discloses the second layers and the support layer comprise substantially the same material (Fig. 1a).

Regarding claim 17, Ho discloses sacrificial layers between the structure layers, the sacrificial layers undercut to define the gaps (Fig. 1a).

Regarding claim 18, Ho discloses the support layer material selected is GaAs (Fig. 1a).

Regarding claim 19, Ho discloses the structure layers material comprises GaAs (Fig. 1a).

Regarding claim 21, Ho discloses the support layer holds the second layers substantially parallel to each other (Fig. 1a).

Regarding claim 23, Ho discloses the support layer further holds the plurality of structure layers substantially parallel to each other (Fig. 1a).

Claim Rejections - 35 USC § 103

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negatived by the manner in which the invention was made.

Claims 14 and 15 are rejected under 35 U.S.C. 103(a) as being unpatentable over Ho in view of Baillargeon.

Ho teaches the invention as claimed but lacks reference to the conductivity of the support layer. Baillargeon teaches the use of a support layer (18 and 20) with an electrically conductive portion (20) and an electrically non-conductive portion (18). It would have been obvious to a

person of ordinary skill in the art at the time the invention was made to have the support layer contain an electrically conductive and non-conductive portion as taught by Baillargeon for the purpose of supplying a pumping energy in order to create a laser out of the Bragg reflector.

Allowable Subject Matter

Claims 20, 22 and 24 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.

The following is a statement of reasons for the indication of allowable subject matter:

The prior art of record fails to teach or suggest the use of a support layer which partially overlaps the top structure layer.

Claim 26 is allowed.

The following is an examiner's statement of reasons for allowance:

The prior art of record fails to teach or suggest the use of a support layer overlapping a top portion of the top structure layer.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue Art Unit: 2872

fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

Response to Arguments

Applicant's arguments, see Amendment, filed June 10, 2004, with respect to the rejection(s) of claim(s) 12-20 under Tayebati have been fully considered and are persuasive.

Therefore, the rejection has been withdrawn. However, upon further consideration of the newly amended claims, a new ground(s) of rejection is made in view of Ho.

Conclusion

Applicant's amendment necessitated the new ground(s) of rejection presented in this Office action. Accordingly, **THIS ACTION IS MADE FINAL**. See MPEP § 706.07(a). Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event,

Application/Control Number: 10/022,757

Art Unit: 2872

however, will the statutory period for reply expire later than SIX MONTHS from the date of this final action.

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Joshua L Pritchett whose telephone number is 571-272-2318. The examiner can normally be reached on Monday - Friday 7:00 - 3:30.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Drew A Dunn can be reached on 571-272-2312. The fax phone number for the organization where this application or proceeding is assigned is 703-872-9306.

Information regarding the status of an application may be obtained from the Patent Application Information Retrieval (PAIR) system. Status information for published applications may be obtained from either Private PAIR or Public PAIR. Status information for unpublished applications is available through Private PAIR only. For more information about the PAIR system, see http://pair-direct.uspto.gov. Should you have questions on access to the Private PAIR system, contact the Electronic Business Center (EBC) at 866-217-9197 (toll-free).
